Technical Bulletin

Dated: June 7, 2023
Re: Ballast Weight Fulton/Brewerton

Re Ballast Weight:

Effective the weekend of June 16, in the interest of safety to competitors, the maximum allowable amount of ballast weight mounted on the driveshaft shield shall be twenty (20) pounds in total.

Teams are also reminded per the DIRTcar rulebook governing ballast weight:

- a. All weight(s) must have a minimum of two (2) 1/2"-inch diameter grade 5 bolts and/or studs passing completely through the weight.
- b. All weights must be painted white and clearly labeled with the car number on it. Lead may be used for ballast, pellets or liquid type weight ballast will not be permitted. All materials must be approved.

Call (315) 374-1168 or email marketing@brewertonspeedway.com with any questions.
